

JISOM procedures for scientific acceptance

The article must be original and it cannot be sent to another review for publishing from JISOM sending time until its evaluation status ending. The article will not contain the authors names and it is sent to three reviewers. If the reviewers decide that article can be published then will be published in JISOM. Our reviewers will evaluate submitted papers against the following check points:

- Relevance from JISOM
- Originality
- Significance; usefulness
- Technical soundness
- References to the related literature
- Presentation
- Linguistic quality.

If the reviewers ask for revision of the article then the authors should make the revision and article will be published after the reviewers acceptance.

If the modifications asked by the reviewers are important then the editorial board will decide and will send to the authors the carrying on or stopping of the work on the article.

If the reviewers reject the article then the notification will be send to its authors.

By submitting an article to JISOM journal, the author(s) understands that manuscripts have not already been published or which are being considered by other journals while JISOM would be considering the same.

When an article is accepted the author will be required to complete a Copyright Assignment and to warrant that the article does not contain any existing copyright.
